In comparison to his peers, Dalton Conley sees himself as having more advantages or opportunities in life, or fewer limitations on his life chances. Thus, he attributes his own success to more than his own effort or natural intelligence. How does Conley explain the social mobility that he experiences? (In developing your response, please reflect on at least 2 advantages/privileges that he discusses.)

This extra credit response is worth a maximum of 15 points or 3 percentage points on your final grade and should be approximately 1.5-2 pages double spaced, and is due on or before Friday, April 11th.
